

THINNER FADE OUT

PRODUCT DESCRIPTION

The thinner allows to prepare an imperceptible mixture of 2-pack colorless acrylic clear coats. Its purpose is to dissolve the dust settling around the repair area and to level the optical brightness difference on the border of old and freshly applied coat of acrylic lacquer. It ensures easy and quick flattening even when used with high solid coats (HS, VHS).

PROPERTIES

- Quick drying.
- Smooths the surface.
- Flats the surface.
- Retains gloss finish even under high temperatures (to 60 °C).
- Practical in use.

USING

Can be used in standard system (with «STANDARD» hardeners) or in fast system (with «FAST» hardeners).

PROCEDURE

Apply 1-3 thin layers on the border of old and new layers of lacquer.
Apply immediately after applying last coat of lacquer.

CAUTION! This technical sheet gives directions for shading of METHOD lacquer coats. Details on these lacquer coats are given in the corresponding technical sheets. For your safety, always act in accordance with the information contained in the technical operation sheet for dangerous substances for this product.

SPRAY ADHESION

Product is ready for use, ca. 10s., DIN 4 20 °C.

STORAGE

Store the product in a sealed container, in dry and cool places, away from fire and heat sources, as well as direct sunlight.
