

SILICONE DEGREASER

DEGREASING AGENT

PRODUCT COMPOUNDS

Silicone Remover

PRODUCT DESCRIPTION

Is used for surface cleaning before laquering. Impurities such as silicone, wax, grease are dangerous as they prevent from achieving a good laquer coating. Can be used on metal and plastic surfaces.

VOLATILE ORGANIC COMPOUNDS

VOC for the mixture = 738 [g/l]. The product fulfills the EU directive (2004/42/WE) that sets the VOC value for this product category (B/1) as 850 [g/l] for ready product.

SURFACE PREPARATION

THE PRODUCT IS USED ON CLEAN SURFACES:

- metal surface, also primed.
- steel surface.
- aluminum.
- old lacquer surfaces.
- polyester putties.
- stainless steel.
- acrylic fillers.

Metal surfaces must be cleaned minimum 2 times. Every time use clean cloth.

CAUTION! To maintain safety, always follow the instructions given in the MSDS for the product.

STORAGE

Store the product in a sealed container, in dry and cool places, away from fire and heat sources, as well as direct sunlight.
